Afrique Telecom, Eutelsat and Wikimédia France to offer free access to French-language Wikipedia in Africa

From left to right: the partnership agreement was signed by Michel Azibert (Eutelsat), Nathalie Martin (Wikimédia France) and Philippe Tintignac (Afrique Telecom)

Paris, 1st December 2015 - Afrique Telecom, Eutelsat and Wikimédia France combine skills in large-scale initiative to extend free access to French-language Wikipedia in Sub-Saharan Africa via Wi-Fi hotspots

Free access to Wikipedia

Afrique Telecom is progressively deploying Internet solutions over Sub-Saharan Africa in combination with Eutelsat's satellite capacity. Its "TamTam" service extends access to the Internet in rural areas using Wi-Fi hotspots for collective access. In a new step announced today, "TamTam" will be used to offer free access to French-language Wikipedia content for many thousands of users. This initiative, starting in French-speaking Africa, supports Wikimédia France's strategy to promote free access to educational content, in particular through Wikipedia.

In order to offer free, unlimited access, Afrique Telecom has developed a server located at "TamTam" hotspots that will locally host French-language Wikipedia content. The content will be updated regularly via a satellite link provided by Eutelsat.

A major pilot project

Afrique Telecom's ambition is to roll-out "TamTam" to between 4,000 and

8,000 hotspots in the next two years. Eutelsat has agreed to finance servers hosted by the first 1,000 hotspots as a springboard that will also measure the impact of the service.

The Wikimedia movement has made a priority of improving accessibility and content creation on Wikipedia for so-called “Southern” countries. There is still a large gap between Northern and Southern countries in terms of the number of readers and contributors to Wikimedia platforms as well as content on Southern countries. French-speaking Africa is a priority action area for the Wikimédia France Foundation, as a complement to its Afripédia project.

Wikimédia France

Wikimédia France, an association for free knowledge-sharing, was founded in 2004 to promote and support all projects hosted by the Wikimedia Foundation in France. Wikimédia France does not produce or host any Wikimedia Foundation projects, but strives to enrich them and raise their profile through its members' support of its actions.
