Eutelsat OneWeb launches 'Land Mobility' connectivity services

Paris, 26 February 2024 - Eutelsat Group (ISIN: FR0010221234 - Euronext Paris / London Stock Exchange: ETL), has confirmed the launch of Eutelsat OneWeb's low Earth orbit (LEO) mobility services, bringing high-speed communications 'on the move' into reality for land-based customers.

The launch of Land Mobility services enables Eutelsat OneWeb's distribution partners to implement comms on the move solutions for customers around the world. The service activation opens up new revenue opportunities for rail connectivity, as well as services for emergency responders, the media, oil and gas industries, mining, government and NGO customers. The service is now

available through more than 30 of Eutelsat OneWeb's existing distribution partners and leverages Kymeta Hawk™ u8 flat panel user terminal (UT) enabled for mobility, with a wider suite of terminals coming later this year.

This announcement means customers across North and South America, Europe and Australia are now able to access download speeds of up to 200Mbps while travelling, or while mobile at work in industries such as agriculture, mining and governmental services. Coverage and availability will be extended as Eutelsat Group completes the roll-out of its ground segment to enable true global coverage.

These innovative low Earth orbit powered mobility services have been developed and extensively tested alongside leading industry partners, including the European Space Agency and the UK Space Agency. With land mobile and portable connectivity now available across the network, Eutelsat OneWeb will be offering these services to both existing and potential partners and markets.

Commenting, Stephen Beynon, Co-President of Connectivity at Eutelsat Group, said: "The launch of Eutelsat OneWeb's Land Mobility services brings high-speed, low-latency connectivity to under-served industries such as transport, first responders and the international aid sector. We are looking forward to meeting the huge demand for connectivity on the move services by working closely with our trusted distribution and technology partners."

About Eutelsat Group

Eutelsat Group is a global leader in satellite communications, delivering connectivity and broadcast services worldwide. The Group was formed through the combination of the Company and OneWeb in 2023, becoming the first fully integrated GEO-LEO satellite operator with a fleet of 35 Geostationary satellites and a Low Earth Orbit (LEO) constellation of more than 600 satellites. The Group addresses the needs of customers in four key verticals of Video, where it distributes more than 6,500 television channels, and the high-growth connectivity markets of Mobile Connectivity, Fixed Connectivity, and Government Services. Eutelsat Group's unique suite of in-orbit assets enables it to deliver integrated solutions to meet the needs of global customers. The Company is headquartered in Paris and the Eutelsat Group employs more than 1,700 people across more than 50 countries. The

Group is committed to delivering safe, resilient, and environmentally sustainable connectivity to help bridge the digital divide. The Company is listed on the Euronext Paris Stock Exchange (ticker: ETL) and the London Stock Exchange (ticker: ETL)
