Eutelsat puts Ultra HD centre stage at MIPTV

Cannes, Paris, 9 April 2015 – The vision of the future will soon become a reality for millions as the broadcast industry lines up to adapt to Ultra HD TV, the new benchmark in commercial broadcasting. With a wealth of benefits including a broader range of colours, higher frame rates, a smoother viewing experience and greater luminosity, Ultra HD will surpass consumer expectations today and in the decades to come.

Players in content production are preparing for the development and implementation of this new technology. Some of the leading actors will assemble in Cannes from April 13 to 14 for MIPTV's 4K focus, supported by Eutelsat. They include executives from the BBC, NHK and RTVE as well as Eutelsat's Michel Chabrol, Director of Marketing Innovation and Digital Cinema.

Since its first broadcasts of Ultra HD in January 2013, Eutelsat has amassed industry-leading expertise on the conditions for successful transition to this new format. Two Eutelsat satellites are broadcasting permanent channels in 4K, showing co-productions with Eutelsat and content produced by programme-makers who have sought out Eutelsat to showcase and promote their work via satellite, including The Explorer's Network, Travelxp India and K2 Communications.

"MIPTV's 4K Focus is concentrating on getting programme makers to discuss the practical issues to be addressed for Ultra HD to be mass market in viewer homes. It will look at the pace of Ultra HD production as well as storage and delivery, live events, audience feedback and expectations," said Michel Chabrol. *"Industry forecasts are that there will be 1 000 Ultra HD channels broadcasting over the coming 10 years, principally by satellite. We are on the cusp of a new age and there is no better place than MIPTV for programme makers to discuss the opportunities."*

If you want to speak to Michel Chabrol about Ultra HD during MIP TV please contact:

Marie-Sophie Ecuier at mecuer@eutelsat.com or at + 33 6 89 62 17 74

More information on Michel Chabrol's welcome address at MIPTV's 4K focus is available [here](#).
